MELUR RAMAKRISHNAIAH
PRIMARY EXAMINER

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the present invention relates to video teleconferencing and transmission of audio, video, and commands between locations separated by distance.

The prior art of record in combination or alone fails to teach or suggest these elements of the independent claims 43 and 47 in combination with other elements. For example independent claim 43 has limitations such as screen adapted to display a subject, the screen having a posture controllable by the subject, a camera adjacent to the screen and trainable on a desired location, the camera allowing the subject to view the desired location, a base, a frame including: a platform rotatably mounted to the base, a trunk pivotably mounted to the platform, a neck pivotably mounted to the trunk, an extension motor mounted to the platform and adapted to pivot the trunk to the platform, and a pivot motor mounted to the platform and adapted to pivot the neck relative to the trunk, wherein the screen is connected to the neck. Independent claim 47 has limitations such as a base, a frame including: a platform rotatably mounted to the base, a trunk pivotably mounted to the platform, a neck pivotably mounted to the trunk, a display screen mounted with the neck and adapted to display a subject, a camera adjacent to the display screen and trainable on a desired location, the camera allowing the subject to view the desired location, and a remote terminal accessible to the subject, wherein the movement of the platform, the trunk, and the neck is controllable by the subject by way of the remote control. For the above reasons independent claims 43, 47 and dependent claims 44, 46, 48-66 are allowable.

Art Unit: 2614

2. Claims 43-44, 46, 47-66 (now renumbered 1-23) are allowed.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

--(6,208,505) to Kuchta discloses the following: in a computer, keyboard and flat-screen monitor support assembly a base is adapted to support a desktop type computer housing thereon.

--(2004/0011938A1) to Oddsen, Jr. discloses an apparatus for a plurality of electronic devices which is adapted for positioning electronic devices in plurality of orientations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
